

IMMERSIVE WORKSPACES

Equip any space with Igloo
Shared VR technology

AN IGLOO IN EVERY OFFICE AND FOR EVERY COMPANY

With Igloo technology, you can take any digital content (including immersive, virtual reality or 360° content) and put it in a shared immersive space that anyone can use.

There is no need for a huge fit out; irrespective of size or shape, Igloo technology can be retrofitted in existing meeting and office spaces.

Whatever you want on the walls, you can have it, thanks to Igloo's content-agnostic platform.

Work with the tools you already use, launch and run real-time applications, view websites in 360°, present and interrogate data, access your corporate Microsoft and Google suites, and much, much more.

USE CASES FOR ANY BUSINESS IN ANY SECTOR

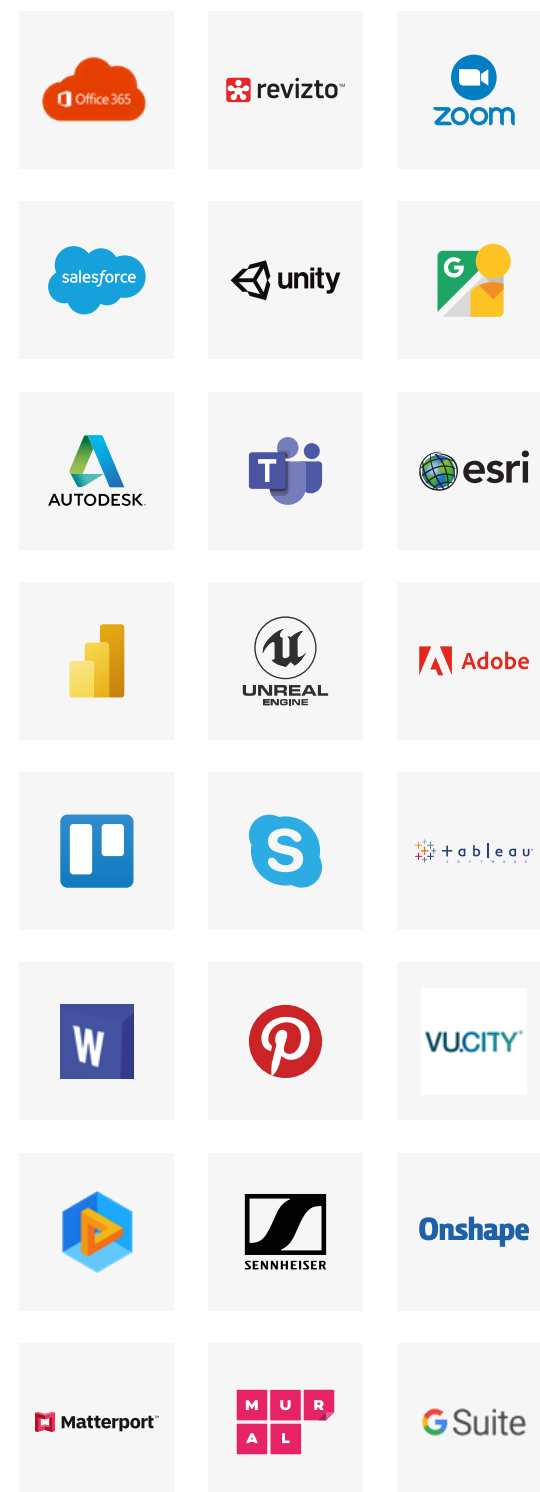

Whoever you are, whatever your business, wherever you operate, Igloo's immersive workspaces can get right to work for:

- Team briefings and project updates
- Sit-up-and-take-notice presentation formats
- Room-scale data visualisation and interrogation
- Ideation, brainstorming, and blue-skying
- Corporate storytelling, with 360° stings & sizzlers
- Immersive training

SURROUND YOUR TEAMS WITH THEIR DAY-TO-DAY APPS

All your tools are on the walls around you - such as websites, web-based applications, dashboards, data visualisations, spreadsheets, video conferencing platforms, 3D design tools, and more.

As a team member collaborating in an immersive workspace, it is easy for you to see, and understand, and discuss, and control every aspect of every project you are working on.

BRING TOGETHER TEAMS FROM AROUND THE WORLD

Thanks to integration with all the leading video conferencing platforms (like Zoom, Microsoft Teams, Google Meet, etc.), remotely-located teams can be brought into the heart of the discussion, and report back from onsite to colleagues based at the office.

IGLOO HAS CREATED IMMERSIVE WORKSPACES FOR ALL SORTS OF CLIENTS

Igloo has been used to create immersive workspace environments across a wide and global variety of sectors such as consulting, education, healthcare, real estate, architecture, engineering, and construction.
