

# QUICKFIRE MEETING ROOMS

Scalable workplace technology  
for agile communication and  
collaboration

### WHY QUICKFIRE?

- Simplify and speed up the process of technology procurement
- Increase operational effectiveness
- Develop and implement technology standardisation
- Ensure high levels of user adoption
- Simplify user and workplace support

## THE DEPLOYMENT OF WORKPLACE TECHNOLOGY DOESN'T NEED TO BE COMPLICATED

The time involved in researching, specifying, purchasing, and deploying workplace technology is fast becoming a time burden on many organisations. As the dependency on technology and the frequency of product updates and launches intensifies, it becomes very difficult for many organisations, across all sectors, to remain focused on their core operational and business activities.

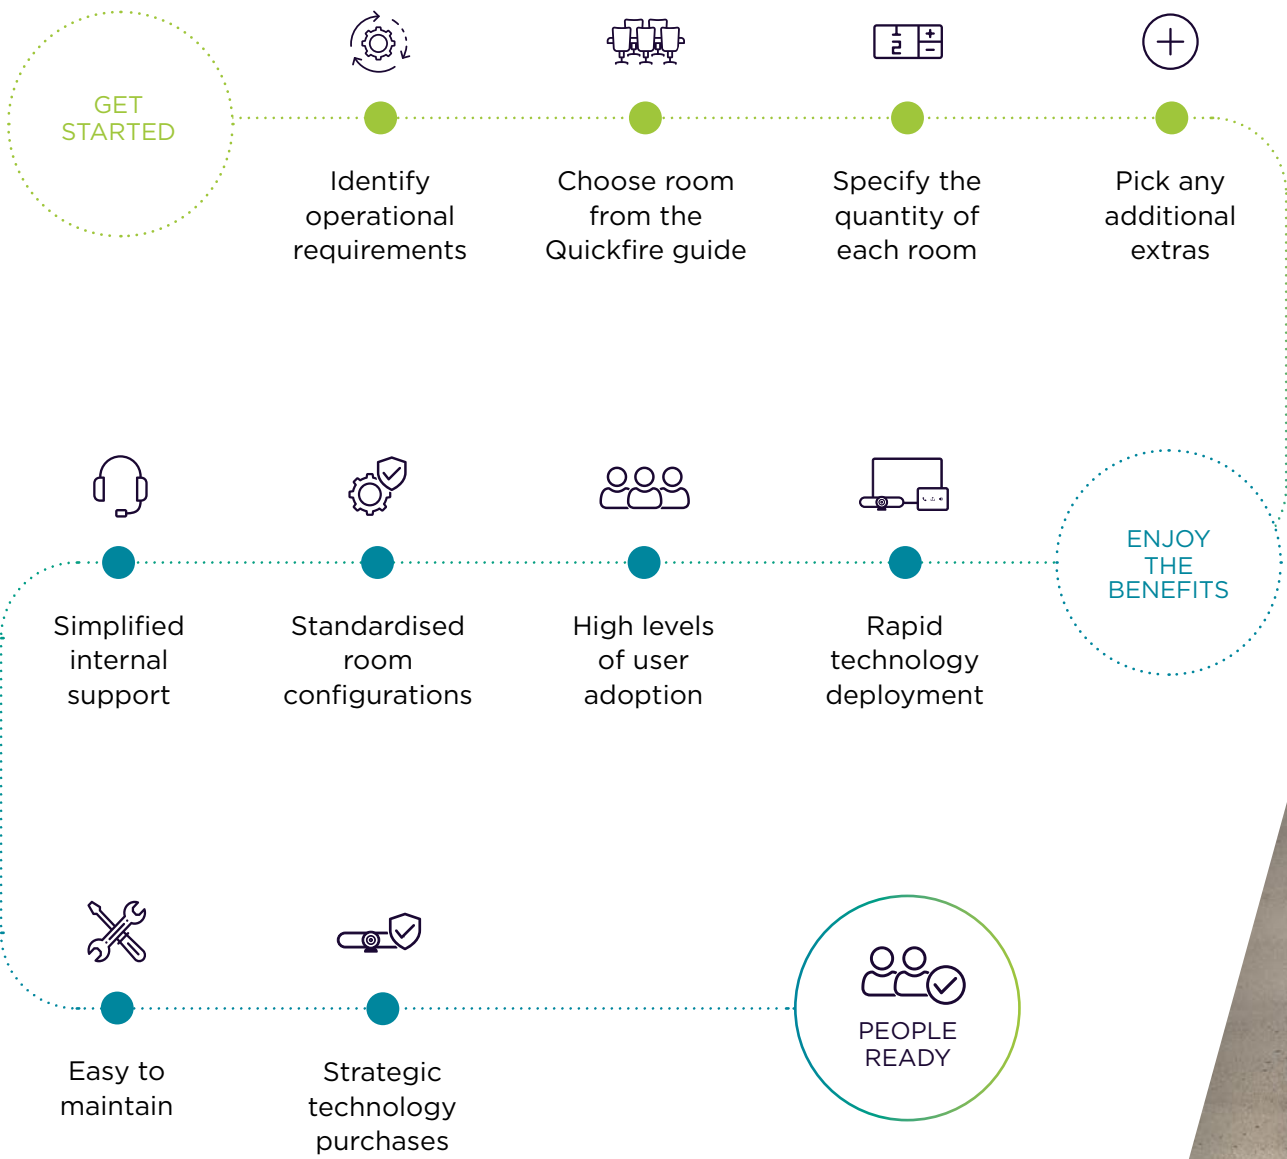

Defining a set of technology standards organisation-wide significantly speeds up the procurement and installation of these facilities. Rather than reinventing the wheel for each new room with a prolonged procurement cycle, organisations can select from a set number of environments specifically designed to cover most day-to-day operational needs.

# IT COULDN'T BE SIMPLER

Working closely with our innovative manufacturing partners, our specialists have designed a range of QuickFire rooms that simplify workplace technology procurement. These are quick to procure, fast to install and a breeze to support.

Our solution architects have been designing, specifying, and configuring workplace AV and collaboration facilities for some of the world's leading brands for over five decades. This vast experience means deployment is consistent and strategic, and each meeting room is people ready from day one.

# VISAVVI QUICKFIRE RANGE

Across buildings, sites or global infrastructures, our QuickFire range of small, medium and large meeting rooms provide standardised collaboration environments to cover the operational requirements of most modern organisations.

QUICKFIRE ROOM

Large

Medium

Small

SMALL

#### STANDARD

43" HD display screen with wall mount

Wired table input with multi display adapters

#### ADDITIONAL OPTIONS

Video/audio collaboration solutions

Wireless content sharing solution

2-4

#### SMALL MEETING ROOM WITH WIRED PRESENTATION CAPABILITIES

These rooms provide simple but highly effective content display capabilities for small spaces.

With HD as standard, wired table inputs, and the option to add in more sophisticated collaboration and content sharing solutions – these rooms are key to effective hybrid working.

## STANDARD

HD conference camera

55" HD display screen with wall mount

Wired table input with multi display adapters

Wireless content sharing & microphone

## ADDITIONAL OPTIONS

HD auto input switcher scaler

6-8

## MEDIUM MEETING ROOM WITH BYOD VIDEO & AUDIO- CONFERENCING CAPABILITIES

As workers embrace communication and collaboration software tools, these rooms with enhanced meeting capabilities are rapidly becoming highly in-demand resources.

Installed with professional grade USB audio and video collaboration devices, these facilities allow users to easily communicate in HD and direct from their own laptop.

AV as a Service

LARGE

#### STANDARD

75" HD display screens with wall mount

Wired table input with multi display adapters

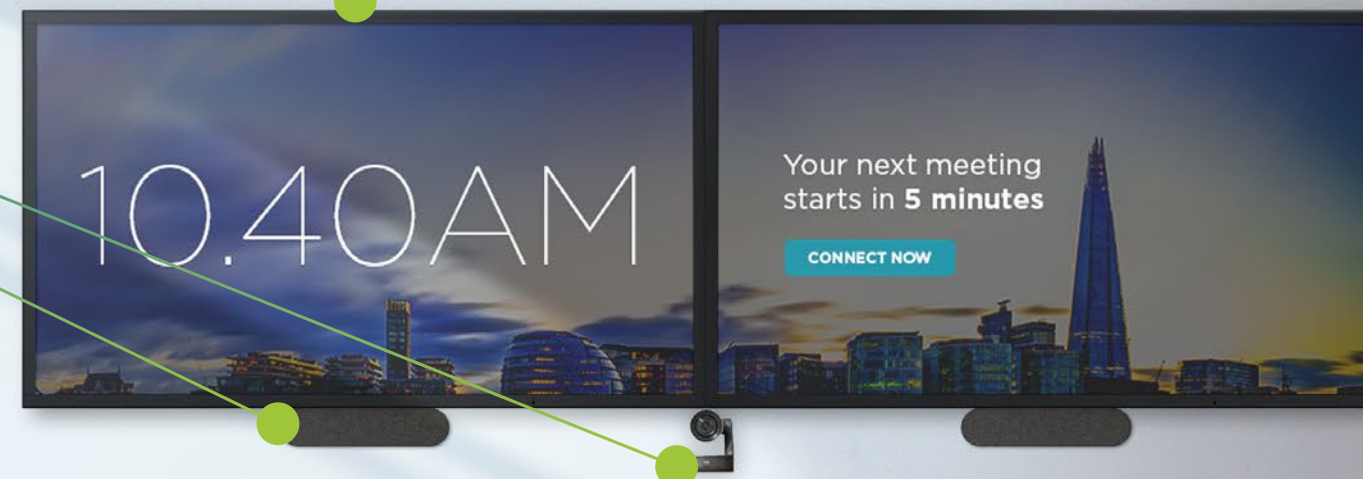

Multiple HDMI inputs

Premium HD conference camera

Wall mounted directional audio system

#### ADDITIONAL OPTIONS

Wireless content sharing solution

10-12

#### LARGE MEETING ROOM WITH BYOD VIDEO & AUDIO-CONFERRNCING CAPABILITIES

The work horse of most organisations, these meeting rooms are busy, productive hubs.

Installed with an impressive range of technology, these facilities provide enhanced presentation, video and audio collaboration capabilities, with business agility as standard.

Users can quickly connect their own laptop and experience immersive presentation capacities. The laptops' video conferencing software client now becomes a powerful, large room videocollaboration device.

AV as a Service

# WHY VISAVVI

We have been an industry leading professional workplace technology integrator for over five decades. Blending an unrivalled portfolio of solutions and services with award-winning engineering and support capabilities, we create stunning communication and collaborating environments for the world's leading brands.

## ADDITIONAL SERVICE OPTIONS

From managing the lifecycle of your AV assets to ongoing support, trust our team of innovative industry specialists to help you define a better way to equip your workplace.

### AVAAS

AV as a Service from Visavvi makes it simple, quick and easy to access audio visual and collaboration technologies and services through subscription rather than capital purchases. This enables organisations to optimise budgets whilst gaining access to the very latest technology. We manage the entire life cycle of the AV assets, from initial supply to sustainable redeployment of redundant equipment.

### SUPPORT & MONITORING

We offer the most comprehensive range of service and maintenance contracts available. Our 24/7 support provides everything an organisation needs to be confident their audio visual and collaboration technology works seamlessly – and with geographically dispersed engineers ready to help, we're never far away when it doesn't.

- Equipment loan
- Service level agreement
- Preventative maintenance
- Asset management
- Incident management
- Embedded engineer services

### VANTAGE FROM VISAVVI

A subscription-based service providing intelligent 24/7 remote monitoring of workplace technology. Securely accessing AV facilities; Vantage enables our engineers to resolve most issues without making a physical visit, substantially increasing immediate fault resolution and dramatically reducing system downtime.
